

# ST. FRANCIS

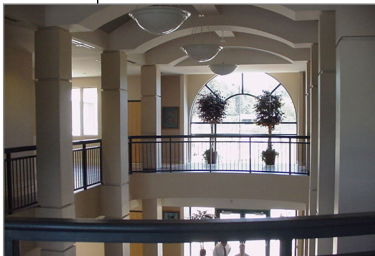

*"The staff at MOMA did an excellent job in evaluating our educational needs and addressing those needs within a tight financial structure and within some significant environmental restrictions. I feel they provided quality assessment and monitoring throughout the project, which allowed us to complete our high school building on time and within budget".*

*Drew Buccellato  
Headmaster  
The Saint Francis Schools*

In 1995, a general contractor recommended that the Saint Francis Schools interview MOMA Architecture for the design of its new high school building to be constructed on the Roswell Campus. As the saying goes, "the rest is history". Since the design and construction of this building, MOMA Architecture has been retained to design a new high school campus in Alpharetta, an elementary classroom annex, a locker room addition and renovate an existing building. The structures on the new high school campus include a two-story classroom building, a gymnasium/physical education building, a cafeteria dining hall, an auditorium/fine arts center, a library/classroom building and a practice gymnasium/classroom/storage building.

The Saint Francis School is a private educational provider that has experienced rapid growth due in part to its philosophy of "allowing each child to realize his or her full learning potential by providing a balanced, well rounded program. At MOMA, we believe that we offer a balanced, well-rounded program of services that is responsible for our 85% ratio of repeat clients versus new clients.
