

TYCO

"We had a vague concept of what we wanted, but you were able to put our thoughts into a design which turned out to be truly first class. We are extremely proud of our facility and constantly get compliments on its design. You helped to keep the project both within budget as well as on schedule. I also appreciate the fact that you have been diligent in following up on "punch list" type items for a year after we occupied the building".

Garnett A. Smith
*Chairman and Chief Executive Officer, retired
Inbrand Corporation
(now TYCO Healthcare)*

Clients are often faced with the dilemma of selecting an architecture firm with either a reputation for design excellence or for service quality. MOMA Architecture was founded on the premise that one firm can embrace and deliver both. Tyco's international headquarters and distribution facility is a testament to what is possible when a design firm excels at delivering both. As a result of this project, MOMA was awarded the American Concrete Institute's Outstanding Achievement Award.

Since that time, MOMA Architecture has been retained to provide design solutions for expanding the existing building in order to integrate new manufacturing activities. TYCO International, Ltd. is one of the fastest growing companies worldwide. The company has become a recognized leader in undersea telecommunications, electronics, fire/security, healthcare/specialty products and capital financing. We invite you to learn more about this rapidly expanding company at the following link:
