

UNITED STATES POSTAL SERVICE

"MOMA Architecture has continually shown us its diversity and willingness to adapt to changing project types. Ever conscious of customer service, my priorities, often changing with the needs of the business, were always kept as your priorities. MOMA has always worked with us to obtain the quality, on-time and in-budget performance that we value".

*Debra K. White
USPS Contracting Officer*

MOMA's performance and expertise in project design, construction requirements, cost estimating, contractual negotiations, pre-construction conferencing, construction contract administration, response to contractor's request for information, site reviews of construction in progress, pre-final to final inspections for completion, and certification of all contractual commitments has been excellent".

*Kenneth A. Skillern
USPS Facilities Specialist*

In 1993, MOMA Architecture was awarded its first Indefinite Quantity/Indefinite Delivery contract with the United States Postal Service. Due to the quality of our design work and client service, this contract has been renewed annually. Our services include programming, design, contract administration and relocation planning for a diversity of project types from new construction, to expansions, to renovations. To date MOMA has completed over of 250 projects for the USPS. Project types include new Main Post Office retail/carrier facilities, renovation of main processing/distribution bulk mail facilities, office renovations/relocations, re-roofing projects, HVAC replacements, lighting replacements and security upgrades. We invite you to learn more about USPS on-line services at the following link:
